ALYSSA'S LAW NEW JERSEY

FEBRUARY 6, 2019

New Jersey Governor Phil Murphy signed “**Alyssa’s Law**”, a critical legislation addressing the issue of response time for First Responders in life-threatening situations on student campuses. This Law requires all New Jersey public schools to install Panic Alarm devices that will INSTANTLY and SILENTLY alert law enforcement of emergency situations requiring their immediate on-site response.

This law is in memory of Alyssa Alhadeff, a 14-year-old who was among the 17 people that were killed at the Parkland Shooting at Marjory Stoneman Douglas High School on February 14, 2018.

WHAT DOES COMPLIANCE LOOK LIKE?

Compliance with Alyssa’s Law can be as simple as installing a single, centrally located Panic Button (typically in the Main Office) in each of your school buildings. This Panic Button Alert System, also known as “**Alyssa’s Alert**” will directly link to a custom list of multiple first responder agencies, ensuring real time coordination and cutting response time in half.

ALERT SYSTEM EXPANSION

Our experienced and professionally trained Security System Engineers can walk you through a variety of highly versatile Alert expansion options to fit your existing system and also introduce you to many custom control and monitoring features that can be added, such as;

- Multiple Panic Devices in Strategic Areas
- Gunshot Detection (via Gunshot Detection Sensors & Cameras)
- Weapons Detection (via IP-Connected Cameras)
- Air Quality Detection (via “Vape” Sensors)
- Scream Detection (via IP-Connected Cameras)
