Security Center Unified Platform

Portfolio Overview

Genetec's Security Center is a user-friendly application that provides an all-inclusive platform for video surveillance, access control, license plate recognition and intrusion detection. With this unified system, you can rest assured knowing your safety needs are being met with ease.

With the mobile application, staff members can remain connected wherever they may be on or off-site. Plus, with add-ons available at any time it's super simple to expand and customize your security system according to your needs!

Omnicast™

IP Video Management

A versatile IP video
monitoring system

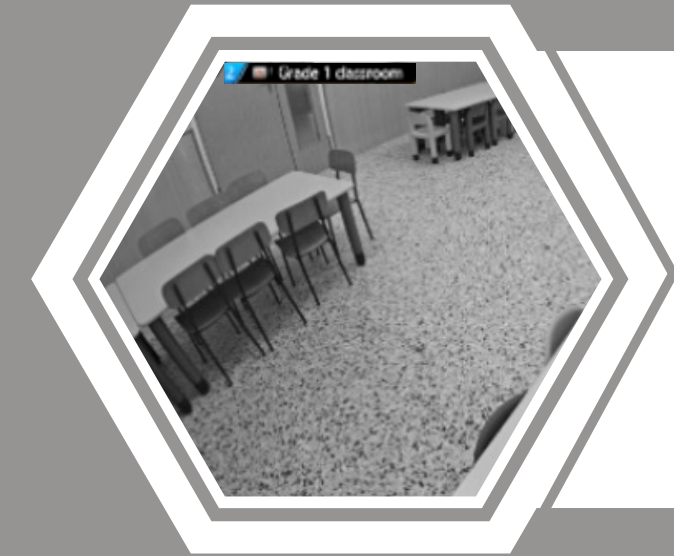

Omnicast™ Video Management

Protect safety & privacy on campus

The powerful Omnicast™ IP video management system instills school security with assurance that their videos are always securely recorded. With intuitive tools such as Visual Tracking, operators can easily track and monitor any incidents on the premises while effortlessly switching from camera to camera. Designed to flexibly adjust according to your campus needs, Omnicast™ provides you with dependable data for effective decisions.

To ensure the safety of students and staff on campus, Omnicast™ offers an extensive array of privacy and authentication tools to meet public area video monitoring regulations. You'll have greater visibility into your school's activities while still protecting everyone's identity!

Synergis™

IP Access Control

An access control
solution built for today's
challenges

Secure Access and Optimize Operations

Synergis™ IP access control system is designed to give you the peace of mind that your school will be safeguarded from any security threats. With its capability to remotely unlock and lock doors, as well as monitor entry points, Synergis™ gives operators unprecedented control over who can gain access into restricted areas on campus. This heightened level of protection helps ensure a safe learning environment for both students and staff alike.

Synergis™ provides a revolutionary solution. As an open system, it is compatible with numerous third-party access control devices for enhanced security and flexibility. Unified with video surveillance and other systems, the platform grants valuable insights into your secure areas to guarantee improved operations through more informed decision making.

HARDWARE:

Synergis™ Cloud Link

- A Smart and Secure Access Control IoT Gateway

Cloud Link Roadrunner

- IoT Device for Enclosure Management

Intelligent Controllers

- Choose from a Range of IP-Based Controllers

Electronic Locks

- Extend your Reach with Electronic Locks

AutoVu™

License Plate Recognition (LPR)

Find vehicles of interests and
speed up investigations

AutoVu™

High-Performance ALPR that Gives you Real-Time Insights

The AutoVu™ automatic license plate recognition system streamlines the process of reading and identifying license plates, allowing operators to focus on monitoring who is accessing school grounds. What's more, it aids in regulating parking lots, ascertaining parking fees are enforced, barring unauthorized vehicles from entering premises, and maximizing generated revenues.

Know Who's Coming and Going

Identify vehicles entering parking lots, record how long they've been there. From there, your operators can see where most people are parked illegally, and dispatch officers more effectively.

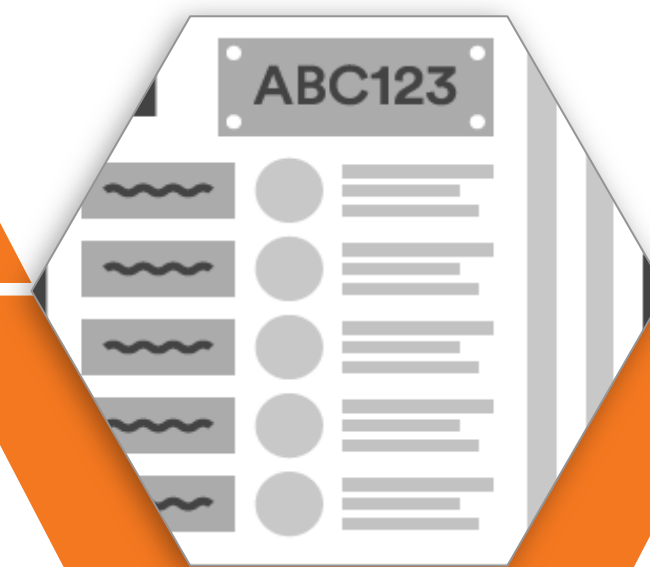

Improve your Awareness

Tie footage directly from LPR or nearby surveillance cameras to give context to license plates and access control events. Associated video heightens security and speeds up investigations.

A Unified Response

Unify your access control and surveillance systems, allows you to act on triggers and alarms across your campus. Modify your system with a change in threat level when a detecting a vehicle of interest.

Advanced Reporting Tools

Accelerate by tracking vehicles fleeing crime scenes. Plot sightings of vehicles of interest across your campus, and rapidly identify suspects.

Who Benefits?

Security Manager

Ensures Student and Staff Safety

- Monitor the physical perimeter and access to restricted areas
- Improve response time to planned tasks and unexpected situations by eliminating data silos and ensuring all teams are working in sync

Superintendent

Accountable for the Overall Management of the School

- Monitors the school grounds from the mobile application
- Receives notifications of possible intruders at night
- Assures parents and community that students are under constant supervision

School Resource Officer

Creates a Safe and Secure Environment

- Promote a safe environment by patrolling the school physically or remotely via a security dashboard
- Ensure everyday student life is protected
- Dispatch and resolve incidents in an efficient and timely manner

IT Director

Supports School Goals with IT Assets

- Unified systems allow for minimal downtime, maximizing uninterrupted service
- Easier to trouble-shoot infrastructure with one platform instead of evaluating different integrations
- Minimize upgrade and maintenance expenditures with a unified platform
