

FORTIFY YOUR SECURITY AND COMPLIANCE

ENTRANCE

Video management software (VMS) with access control creates a unified solution that simplifies your security operations.

ELEVATOR

Integrates with parking & gate access control systems to give customers & staff hands-free mobile access.

TURNSTILES

Easily manage visitor permissions for your office & automatically issue guest passes for visitors.

Business owners can upgrade their access control & door entry systems without the expense of replacing the entire legacy system.

VIDEO MANAGEMENT

Integrates with several leading elevator brands, enabling business owners & staff to secure & manage access to specific floors.

GARAGE

Compatible with major office building turnstile technology, mitigates tailgating without interrupting the flow of traffic in the lobby.

VISITOR MANAGEMENT

OPENPATH AND AVA INTEGRATION

Experience unified security with access control and AI video surveillance. Ava Aware lets businesses add cloud-based AI analytics to existing cameras, tying every access event to video footage in real-time.

BENEFITS

- Improve awareness and security response with real-time video footage
- Easily scale video management across all buildings and sites
- Improve space management for specific zones based on AI analytics
- Temporarily lock entries that have reached capacity via the Openpath platform
- Receive real-time occupancy reports and access logs
